Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27, 29-50, and 95-96, drawn to a method for accepting and recognizing hand drawn entries that further comprises algorithms of analyzing, measuring sizes and attributes of hand drawn entries, and comparing results based on rules, classified in class 382, subclass 187.
 - II. Claims 51-94, and 97-103, drawn to an electronic device that further applies programming methods to convert recognizable hand drawn entries to output further comprises the methods of draw, organize, and display hand drawing attributes, classified in class 382, subclass 190.
2. Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as accepting and recognizing hand drawn entries that further comprises algorithms of analyzing, measuring sizes and attributes of hand drawn entries, and comparing results based on rules. Invention II has separate utility such as applying programming methods to convert recognizable hand drawn entries to output further comprises the methods of draw, organize, and display hand drawing attributes. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
